DETAILED ACTION

Claim Rejections - 35 USC §101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requires of this title.

2. Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The invention as recited in the claims is merely an abstract idea that is not within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter.

Although, the claim recites step (a) as receiving "bids for the item.." at a computer site, it fails to recite that the critical limitations (b), (c), (f) and (h) are performed by a server at the computer site. Furthermore, broad interpretation of step (a) is that the bids are merely (manually) entered at the computer site since no communication of bids data from the bidders' computers is recited.

Steps (b), (c), (f), (h) (calculating..) are broadly interpreted as being performed manually and none of the data communication steps (d)-(e), (g)-(i) have any recitation of technology such communication network.

The examiner suggests that steps (b), (c), (f), (h) (calculating..) be clearly recited as being performed by auction computer or server at the computer site as disclosed in Fig. 1 and auction

data communication be clearly recited from the computer/server to the bidders in order to particularly point out the invention. This would also clearly point out the invention and resolve deficiencies outlined under 35 USC §112 (second paragraph).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(claim 1 is discussed as example. Claims 2-9 also inherit same deficiencies)

Claim 1: (b) “calculating ..” does not relate to limitation (a) “receiving at a computer site..from a plurality of bidders..” because step (b) does not clearly recite that the calculating is also performed at the computer site (or by the computer). Furthermore, step (b) also fails to indicate “bidders” as “the plurality of bidders” to relate to “bidders” of step (a).

The above deficiencies render the claim indefinite because it does not clearly recite:

(i) that the calculating step relate to the bidders from whom the bids are received at the computer site in step (a),

(ii) that the calculations of steps (b)-(c) and (f)-(g) are not being performed by the computer site even if the bids are received thereat. It is unclear why the bids are received at the computer site if *it* does process the bids and subsequently communicate the auction results (interim allocation and interim winning prices) to the bidders.

5. By not clearly stating the aforementioned steps being performed by the computer site the claims are rendered indefinite because the claims fail to recite any functionality of the computer site itself.

It is suggested that the claim be amended to particularly point out the method steps of calculations which are performed by the computer site and that a proper antecedent be provided for the term "bidders" throughout the claim (steps (a)- (g)).

It is also suggested that limitation (e) be amended as follows:

(e) receiving upwardly-revised bids from the bidders at the computer site in response to step (d);

Note: The computer system claim 10 recite the aforementioned method steps and therefor contain similar deficiencies. Claims 11-18 depend upon claim 10 and therefore inherit same deficiencies.

Allowable Subject Matter

6. Claims 1-18 are allowed over prior art contingent upon successful resolution of 101 and 112(second) rejections as discussed above.
